Contemporary Management

Jones/George, Essentials of Contemporary Management is the concise edition of Contemporary Management. Jones and George are dedicated to the challenge of “Making It Real” for students. The authors present management in a way that keeps it relevant to students even if they lack exposure to a “real-life” management context. This is accomplished thru a diverse set of examples and the most popular feature of the text, “Manager as a Person” (Ch. 2). This chapter discusses managers as real people with their own personalities, strengths, weaknesses, opportunities, and problems. This theme is carried thru-out the remaining chapters. Discussions take place regarding the importance of Management Competencies—the specific set of skills, abilities, and experiences that gives one manager the ability to perform at a higher level than another in a specific context. The themes of diversity, ethics, globalization, and information technology are integrated throughout.

Today, relatively small differences in performance between companies, such as in the speed at which they bring new products or services to market or in the ways they motivate their employees to find ways to reduce costs or improve performance, can combine to give a company a significant competitive advantage. Managers and companies that utilize proven management techniques and practices in their decision making and actions increase their effectiveness over time"--

Current management accounting techniques have not been widely accepted as a means to develop a competitive advantage. The information obtained from the literature reviewed and the results from an empirical study that involved a sample of forty respondents from Equity Bank found that the modern management accounting practices provide very important skills and techniques in building competitiveness. The practices play an important role in the planning, developing, implementing and evaluating strategic competitive policies that result in a competitive advantage. The study outlines the importance of management accounting practices in providing strategies that lead to the creation of a competitive advantage in an organisation. However, the conclusions are drawn on a conceptual level and a future empirical investigation is needed to substantiate these claims further. The study also sets a foundation for more focused research into the importance of modern management accounting practices in developing a competitive advantage especially in the banking sector.
