From the afterlife—a new perspective on your life "I know this may come as a shock, and you know I'm not fond of using stale one-liners, but—'reports of my death have been greatly

exaggerated.' I'm as alive now as I was on the day we met, except, maybe, more so.\" If the dead could speak, don't you wonder what they would say to those of us they've left behind? What would they tell us to soothe our sorrow for their loss, calm our fears of what happens when we die, and fire us up to live the best possible lives we can right now? In pages filled with wisdom, humor, and, yes, joy, New York Times best-selling author Mike Dooley explores our most pressing and profound questions about the afterlife—and this life—from the fresh perspective of those who have made the transition to the next phase. Among the revelations and insights they share: · We were ready; you are not. · There's no such thing as a devil or hell. · We're sorry for any pain we may have caused. · Your pets are just as crazy, brilliant, and loving here as they were there. · Nothing we say can prepare you for the beauty of the moment you arrive. You'll learn that our loved ones are not lost to us; that our time on earth is both a school and an adventure; that, all appearances to the contrary, life truly is fair; and that we have it in us to reshape our own

fortunes, starting today.

This book provides an analysis of the country's political economy in transition. It documents the history of the gold mining industry's involvement in shaping the political landscape of South Africa, and shows the degree to which the political transition was induced to put in place a new mode of regulation for capital accumulation. In the process, the victims of apartheid have now become victims of democracy's neo-liberalism as the government is constrained from being developmental, interventionist and redistributive.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in

systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

The Complete Book of Magic and Witchcraft

Architecture's growing intimacy with new types of art *Kissing Architecture* explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art—particularly multimedia installations that take place in and on the surfaces of buildings—and

to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. *Kissing Architecture* is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, *Kissing Architecture* is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after

representation.

This book began as Jean Stephenson's effort to validate the family tradition that her great-great-grandparents emigrated from Belfast to South Carolina under the leadership of Covenanter Presbyterian minister William Martin in 1772. The author was not only able to authenticate the crux of the story, but, in the process, to place nearly 500 Scotch-Irish families in South Carolina on the eve of the Revolutionary War. Genealogists will want to pore over the land evidences assembled by the author from entries

found in the Council Journal, namely, authorizations, survey abstracts, wills, deeds and other records which demonstrate where each family settled, or was entitled to settle. The families, which are grouped under the vessel they traveled in, are identified by the name of the household head, names of spouse and children, number of acres surveyed, county, location of the nearest body of water and the names of abutting neighbor, and the source of the information.
