Lifeway Christian Resources, based in Nashville, Tennessee, is the Christian media publishing and distribution division of the Southern Baptist Convention and provider of church business services.

Until the end of its physical retail presence in 2019 it was best known for its brick and mortar LifeWay Christian Stores, one of the two major American retailers of Christian books and products (the other being Mardel Christian & Education). Lifeway produces curriculums and Bible studies used in Sunday schools and other church functions. Lifeway publishes the Christian Standard Bible (the successor to the Holman Christian Standard Bible), as well as Christian books and commentaries through B&H Publishing. Lifeway has a research division that studies Protestant trends and provides contract research...

notes this curious serendipity: "The original plan was that Ziegenbalg should concentrate on Portuguese and Plütschau on Tamil. For no explicit reason

Bartholomäus Ziegenbalg (24 June 1683 – 23 February 1719) was a German Lutheran missionary and the first Pietist missionary to India. Sent under the patronage of Frederick IV of Denmark, he co-founded the Danish-Halle Mission in Tranquebar (present-day Tharangambadi, Tamil Nadu) with Heinrich Plütschau in 1706. Ziegenbalg is noted for producing the first complete translation of the New Testament into Tamil, for introducing the printing

Common raven

Common ravens are omnivorous and highly opportunistic: their diet may vary widely with location, season and serendipity. For example, those foraging on

The common raven or northern raven (*Corvus corax*) is a large all-black passerine bird. It is the most widely distributed of all corvids, found across the Northern Hemisphere. There are 11 accepted subspecies with little variation in appearance, although recent research has demonstrated significant genetic differences among populations from various regions. It is one of the two largest corvids, alongside the thick-billed raven, and is the heaviest passerine bird; at maturity, the common raven averages 63 centimetres (25 inches) in length and 1.47 kilograms (3.2 pounds) in weight, though up to 2 kg (4.4 lb) in the heaviest individuals. Although their typical lifespan is considerably shorter, common ravens can live more than 23 years in the wild. Young birds may travel in flocks but later mate...

MMR vaccine and autism

Claims of a link between the MMR vaccine and autism have been extensively investigated and found to be false. The link was first suggested in the early 1990s and came to public notice largely as a result of the 1998 Lancet MMR autism fraud, characterised as "perhaps the most damaging medical hoax of the last 100 years". The fraudulent research paper, authored by Andrew Wakefield and published in The Lancet, falsely claimed the vaccine was linked to colitis and autism spectrum disorders. The paper was retracted in 2010 but is still cited by anti-vaccine activists.

The claims in the paper were widely reported, leading to a sharp drop in vaccination rates in the UK and Ireland. Promotion of the claimed link, which continues in anti-vaccination propaganda despite being refuted, has led to an increase...

The Protocols of the Elders of Zion

(1998), *Serendipities: Language and Lunacy*, New York: Columbia University Press, p. 14, ISBN 978-0-231-11134-8
Olender, Maurice (2009), *Race and Erudition*

The Protocols of the Elders of Zion is a fabricated text purporting to detail a Jewish plot for global domination. Largely plagiarized from several earlier sources, it was first published in Imperial Russia in 1903, translated into multiple languages, and disseminated internationally in the early part of the 20th century. It played a key part in popularizing belief in an international Jewish conspiracy.

The text was exposed as fraudulent by the British newspaper The Times in 1921 and by the German newspaper Frankfurter Zeitung in 1924. Beginning in 1933, distillations of the work were assigned by some German teachers, as if they were factual, to be read by German schoolchildren throughout Nazi Germany. It remains widely available in numerous languages, in print and on the Internet, and continues...

Vaccine hesitancy

49 (14): 299–303. PMID 10825086. Pepys MB (December 2007). "Science and serendipity". *Clinical Medicine*. 7 (6): 562–578. doi:10.7861/clinmedicine.7-6-562

Vaccine hesitancy is a delay in acceptance, or refusal of vaccines despite availability and supporting evidence. The term covers refusals to vaccinate, delaying vaccines, accepting vaccines but remaining uncertain about their use, or using certain vaccines but not others. Although adverse effects associated with vaccines are occasionally observed, the scientific consensus that vaccines are generally safe and effective is overwhelming. Vaccine hesitancy often results in disease outbreaks and deaths from vaccine-preventable diseases. Therefore, the World Health Organization characterizes vaccine hesitancy as one of the top ten global health threats.

Vaccine hesitancy is complex and context-specific, varying across time, place and vaccines. It can be influenced by factors such as lack of proper...

Robert Koch

Untersuchung von Pathogenen Organismen (Methods for the Study of Pathogenic Organisms) has been known as the *“Bible of Bacteriology.”* In it he described a novel

Heinrich Hermann Robert Koch (KOKH; German: ['ho:bɛʁt kɔx] ; 11 December 1843 – 27 May 1910) was a German physician and microbiologist. As the discoverer of the specific causative agents of deadly infectious diseases including tuberculosis, cholera and anthrax, he is regarded as one of the main founders of modern bacteriology. As such he is popularly nicknamed the father of microbiology (with Louis Pasteur), and as the father of medical bacteriology. His discovery of the anthrax bacterium (*Bacillus anthracis*) in 1876 is considered as the birth of modern bacteriology. Koch used his discoveries to establish that germs "could cause a specific disease" and directly provided proofs for the germ theory of diseases, therefore creating the scientific basis of public health, saving millions of lives...

Hans Albrecht Eduard Bethe (; German: ['hans 'be:tə] ; July 2, 1906 – March 6, 2005) was a German-American physicist who made major contributions to nuclear physics, astrophysics, quantum electrodynamics and solid-state physics, and received the Nobel Prize in Physics in 1967 for his work on the theory of stellar nucleosynthesis. For most of his career, Bethe was a professor at Cornell University.

In 1931, Bethe developed the Bethe ansatz, which is a method for finding the exact solutions for the eigenvalues and eigenvectors of certain one-dimensional quantum many-body models. In 1939, Bethe published a paper which established the CNO cycle as the primary energy source for heavier stars in the main sequence classification of stars, which earned him a Nobel Prize in 1967. During World War II...

Rafael Edward Cruz (; born December 22, 1970) is an American politician and attorney serving as the junior United States senator from Texas since 2013. A member of the Republican Party, Cruz was the solicitor general of Texas from 2003 to 2008. Since 2025, Cruz has chaired the Senate Commerce Committee.

After graduating from Princeton University and Harvard Law School, Cruz pursued a career in politics, eventually serving as a policy advisor in the George W. Bush administration. In 2003, Texas Attorney General Greg Abbott appointed Cruz to serve as Solicitor General, a position he held until 2008. Cruz was elected to the U.S. Senate in 2012, becoming the first Hispanic American to serve as a U.S. senator from Texas. In the Senate, he has taken consistently conservative positions on economic...

Sapphire

unearthed from Ratnapura, Sri Lanka. This star sapphire cluster was named "Serendipity Sapphire". A rare variety of natural sapphire, known as color-change

Sapphire is a precious gemstone, a variety of the mineral corundum, consisting of aluminium oxide ($\alpha\text{-Al}_2\text{O}_3$) with trace amounts of elements such as iron, titanium, cobalt, lead, chromium, vanadium, magnesium, boron, and silicon. The name sapphire is derived from the Latin word sapphirus, itself from the Greek word sappheiros (σάπφειρος), which referred to lapis lazuli. It is typically blue, but natural "fancy" sapphires also occur in yellow, purple, orange, and green colors; "parti sapphires" show two or more colors. Red corundum stones also occur, but are called rubies rather than sapphires. Pink-colored corundum may be classified either as ruby or sapphire depending on the locale. Commonly, natural sapphires are cut and polished into gemstones and worn in jewelry. They also may be created...
