El-Hi Textbooks and Serials in Print

Research on the mathematics teacher educator (MTE) is an emerging field that is important to understand effective mathematics teacher education in a rapidly changing world. This edited volume addresses the expertise of MTEs —those who support mathematics teachers’ learning and development at various stages of their careers. It positions MTE expertise as extending beyond category-based knowledge, offering new ways of conceptualizing and examining expertise. Part 1 presents global studies that examine MTE expertise in practice. Part 2 highlights innovative methodologies for investigating MTE learning and development. Part 3 features reflective essays by distinguished MTEs, sharing personal insights, historical accounts, and pivotal moments in their professional journeys. This volume is a valuable resource for both new and experienced MTEs seeking to deepen their practice and research.

Mathematics Teacher Educator Expertise

The beginning of the 21st century has seen important shifts in mobility cultures around the world, as the West’s media-driven car culture has contrasted with existing local mobilities, from rickshaws in India and minibuses in Africa to cycling in China. In this expansive volume, historian Gijs Mom explores how contemporary mobility has been impacted by social, political, and economic forces on a global scale, as in light of local mobility cultures, the car as an ‘adventure machine’ seems to lose cultural influence in favor of the car’s status character.

This second volume chronicles the later stages of the outbreak of SARS-Cov-2 (COVID-19) and delineates the role of several disciplines in therapeutic and control measures highlighting the response from specific countries of note and efforts to repurpose and produce new therapeutics and vaccines. By addressing considerations of efficacy and safety of drugs and chemicals used to combat COVID-19, virtually in real-time, this book documents and highlights the advances in science and place the toxicology, pharmaceutical science, public health and medical community in a better position to advise in future epidemics.
