Lunar Lander is a single-player arcade video game in the Lunar Lander subgenre. It was developed by Atari, Inc. and released in August 1979. It was the most popular version to date of the "Lunar Lander" concept, surpassing the prior Moonlander (1973) and numerous text-based games, and most later iterations of the concept are based on this Atari version.

The player controls a lunar landing module, viewed from the side, and attempts to land safely on the Moon. The player can rotate the module and burn fuel to fire a thruster, attempting to gently land on marked areas. The scenario resets after every successful landing or crash, with new terrain, until no fuel remains. Coins can be inserted at any time to buy more fuel.

Development of the game began with the creation of a vector graphics engine...

The Borg-Warner 35 transmission (BW-35) is an automatic transmission produced by the BorgWarner company. This article also applies to variations—the M-36 and M-37. When this article refers to "M-3x" it refers to all models. When model number specific it will use the exact model number.

The "3" in the number refers to the specific series of transmission. The M-3x, 4x, 5x and 6x transmissions are all aluminum cased transmissions that are related to the M-35 (the first of the aluminum Borg-Warner automatics). In this case the rising series number is relative to transmission strength—a larger number will withstand more power than a smaller number. This isn't, however, a general rule with Borg-Warner automatics. The earlier M-8 and M-1x cast iron case transmissions are much stronger than the aluminum...

Under United States federal law, a U.S. citizen or national may voluntarily and intentionally give up that status and become an alien with respect to the United States. Relinquishment is distinct from denaturalization, which in U.S. law refers solely to cancellation of illegally procured naturalization.

8 U.S.C. § 1481(a) explicitly lists all seven potentially expatriating acts by which a U.S. citizen can relinquish that citizenship. Renunciation of United States citizenship is a legal term encompassing two of those acts: swearing an oath of renunciation at a U.S. embassy or consulate in foreign territory or, during a state of war, at a U.S. Citizenship and Immigration Services office in U.S. territory. The other five acts are: naturalization in a foreign country; taking an oath of allegiance...

Table of handgun and rifle cartridges

Reloader Manual. Radford, Virginia: Alliant Techsystems, New River Energetics. Donnelly, John J; Towsley, Bruce (2004). The Handloader’s Manual of Cartridge

This is a table of selected pistol/submachine gun and rifle/machine gun cartridges by common name. Data values are the highest found for the cartridge, and might not occur in the same load (e.g. the highest muzzle energy might not be in the same load as the highest muzzle velocity, since the bullet weights can differ between loads).

M1918 Browning automatic rifle

Honduras Indonesia — Used M1918A2 and FN Model D. In limited service. Israel — Used FN Model Ds. Italy — Used the M1918A2 as the Fucile Mitragliatore Browning

The Browning automatic rifle (BAR) is a family of American automatic rifles and machine guns used by the United States and numerous other countries during the 20th century. The primary variant of the BAR series was the M1918, chambered for the .30-06 Springfield rifle cartridge and designed by John Browning in 1917 for the American Expeditionary Forces in Europe as a replacement for the French-made Chauchat and M1909 Benét-Mercié machine guns that US forces had previously been issued.

The BAR was designed to be carried by infantrymen during an assault advance while supported by the sling over the shoulder, or to be fired from the hip. This is a concept called "walking fire"—thought to be necessary for the individual soldier during trench warfare. The BAR never entirely lived up to the original...

Alpha (original name Alpha AXP) is a 64-bit reduced instruction set computer (RISC) instruction set architecture (ISA) developed by Digital Equipment Corporation (DEC). Alpha was designed to replace 32-bit VAX complex instruction set computers (CISC) and to be a highly competitive RISC processor for Unix workstations and similar markets.

Alpha was implemented in a series of microprocessors originally developed and fabricated by DEC. These microprocessors were most prominently used in a variety of DEC workstations and servers, which eventually formed the basis for almost all of their mid-to-upper-scale lineup. Several third-party vendors also produced Alpha systems, including PC form factor motherboards.

Operating systems that support Alpha included OpenVMS (formerly named OpenVMS AXP), Tru64...

Cardiopulmonary resuscitation

Cardiopulmonary resuscitation (CPR) is an emergency procedure used during cardiac or respiratory arrest that involves chest compressions, often combined with artificial ventilation, to preserve brain function and maintain circulation until spontaneous breathing and heartbeat can be restored. It is recommended for those who are unresponsive with no breathing or abnormal breathing, for example, agonal respirations.

CPR involves chest compressions for adults between 5 cm (2.0 in) and 6 cm (2.4 in) deep and at a rate of at least 100 to 120 per minute. The rescuer may also provide artificial ventilation by either exhaling air into the subject's mouth or nose (mouth-to-mouth resuscitation) or using a device that pushes air into the subject's lungs (mechanical ventilation). Current recommendations...

The Porsche 911 model series (pronounced Nine Eleven or in German: Neunelf) is a family of German two-door, high performance rear-engine sports cars, introduced in September 1964 by Porsche AG of Stuttgart, Germany. Now in its eighth generation, all 911s have a rear-mounted flat-six engine, and usually 2+2 seating, except for special 2-seater variants. Originally, 911s had air-cooled engines, and torsion bar suspension, but the 911 has been continuously enhanced, and evolved across generations. Though the 911 core concept has remained largely unchanged, water-cooled engines were introduced with the 996 series in 1998, and front and rear suspension have been replaced by Porsche-specific MacPherson suspension up front, and independent multi-link rear suspension.

The 911 has been raced extensively...

Ram pickup

The Ram pickup (marketed as the Dodge Ram until 2010 when Ram Trucks was spun-off from Dodge) is a full-size pickup truck manufactured by Stellantis North America (formerly Chrysler Group LLC and FCA US LLC) and marketed from 2010 onwards under the Ram Trucks brand. The current fifth-generation Ram debuted at the 2018 North American International Auto Show in Detroit, Michigan, in January of that year.

Previously, Ram was part of the Dodge line of light trucks. The Ram name was introduced in October 1980 for model year 1981, when the Dodge D series pickup trucks and B series vans were rebranded, though the company had used a ram's-head hood ornament on some trucks as early as 1933.

Ram trucks have been named Motor Trend magazine's Truck of the Year eight times; the second-generation Ram won...

The 7.92×57mm Mauser (designated as the 8mm Mauser or 8×57mm by the SAAMI and 8 × 57 IS by the C.I.P.) is a rimless bottlenecked rifle cartridge. The 7.92×57mm Mauser cartridge was adopted by the German Empire in 1903–1905, and was the German service cartridge in both World Wars. In the first half of the 20th century, the 7.92×57mm Mauser cartridge was one of the world's most popular military cartridges. In the 21st century, it is a popular civiliansport and hunting cartridge in the West.
