A pentagram (sometimes known as a pentalpha, pentangle, or star pentagon) is a regular five-pointed star polygon, formed from the diagonal line segments of a convex (or simple, or non-self-intersecting) regular pentagon. Drawing a circle around the five points creates a similar symbol referred to as the pentacle, which is used widely by Wiccans and in paganism, or as a sign of life and connections.

The word pentagram comes from the Greek word πεντάγραμμον (pentagrammon), from πέντε (pente), "five" + γραμμή (grammē), "line".

The word pentagram refers to just the star and the word pentacle refers to the star within a circle, although there is some overlap in usage. The word pentalpha is a 17th-century revival of a post-classical Greek name of the shape.

Pentagram is an American doom metal band from Alexandria, Virginia. They are noted as one of the pioneers of heavy metal, particularly of the aforementioned sub-genre doom metal. As such, they are considered one of the "big four of doom metal" alongside Candlemass, Saint Vitus, and Trouble. The band's sound has drawn comparisons to Black Sabbath. Pentagram frontman Bobby Liebling has expressed distaste for the "doom metal" terminology, instead preferring Pentagram to be referred to as a "heavy hard rock" band.

While active in the underground music scene of the 1970s, Pentagram produced several demos and rehearsal tapes. However, their first full-length album, Relentless, was not released until 1985; it featured a new lineup, with the only original member being vocalist Bobby Liebling. The band...

Last Rites is the seventh studio album by American doom metal band Pentagram, released in 2011. It was the first album since 1994's Be Forewarned to feature guitarist Victor Griffin.

This album had been in the works for many years under the tentative title Last Rites of the Setting Sun. As indicated in the Last Days Here film, the original plan was to use remaining members Greg Mayne and Geof O'Keefe along with new musicians to round out the lineup for a release on Housecore Records, but things ultimately fell through. Frontman Bobby Liebling announced different songs on Myspace circa 2008 as the album progressed to fruition ("Everything's Turning to Night", "Horseman" and "Walk in the Blue Light" did make it to the album from the original intended track listing). The original intention for...

In geometry, the small stellated dodecahedron is a Kepler–Poinsot polyhedron, named by Arthur Cayley, and with Schläfli symbol $\{5/2,5\}$. It is one of four nonconvex regular polyhedra. It is composed of 12 pentagrammic faces, with five pentagrams meeting at each vertex.

It shares the same vertex arrangement as the convex regular icosahedron. It also shares the same edge arrangement with the great icosahedron, with which it forms a degenerate uniform compound figure.

It is the second of four stellations of the dodecahedron (including the original dodecahedron itself).

The small stellated dodecahedron can be constructed analogously to the pentagram, its two-dimensional analogue, via the extension of the edges (1-faces) of the core polytope until a point is reached where they intersect.
