

Chinese Foreign Policy An Introduction

Chinese Foreign Policy

The question of shifting American power.

Chinese Foreign Policy

First published in 1998. In this study what is proposed here is first of all to examine the effect it had on the very functioning of the Chinese Ministry of Foreign Affairs, and how the turmoil of the Cultural Revolution, of which the country had become a victim, spilled over to this highly elitist and prestigious Ministry. In summary, it focuses on the chaos that engulfed the institution.

Chinese Foreign Policy Think Tanks and China's Policy Towards Japan

Examines Chinese foreign policy think tanks and their influence in China's foreign policy towards Japan between the late 1970s and late 1990s. Through case-studies, this book demonstrates a growing pluralistic trend in post-Mao China's foreign policy-making process.

Chinese Foreign Policy Toward the Third World in the 1970's

This accessible text offers a comprehensive analysis of the European Union (EU)-China relationship, as one of the most important in global politics today. Both are major players on the world stage, accounting for 30% of trade and nearly a quarter of the world's population. This text shows how, despite many differences in political systems and values, China and the EU have developed such a close, regular set of interactions at multiple levels: from political-strategic, to economic, and individual. The authors start with an historical overview of the domestic politics and foreign policy apparatus of each partner to show the context in which external relations are devised. From this foundation, each key dimension of the relationship is analysed, from trade and monetary policy, security, culture and society. The authors show the relative merits of different theoretical perspectives and outline what is next for this complex, ever-changing relationship. At every step, the success of each partner in persuading the other of changing their position(s) for key strategic interests is explored. What emerges is a multifaceted picture of relations between two sides that are fundamentally different kinds of actors in the international system, yet have many mutual interests and a common stake in the stability of global governance. The first major text to offer an accessible introduction to the multifaceted nature of EU-China relations, this book is an ideal companion for upper undergraduate and postgraduate students on Politics, International Relations and European Studies courses.

Globalization: The Paradox of Organizational Behavior is an excellent resource for undergraduate and graduate students, professors, policy makers, and the intelligentsia worldwide. Sagini explores the text's major themes using historical, materialistic, and imperialistic factors. The globalization movement is shaped by economic, political, technological, and cultural forces that transform human collectivities. Instability and related concomitant issues such as disease, energy security, and terrorism challenge the reconstructive role of internal and external factors in foreign policy decision-making. The implications of the global forces on the divided world of gated communities, urban and village ghettos, national borders, and cultural decay could be far-reaching if leaders fail to redesign and implement effective governance models.

The European Union and China

A third edition of this book is now available. This comprehensive and thoroughly updated introduction to Chinese foreign relations discerns the opportunities and limits China faces as it seeks increased international influence. Tracing the record of twists and turns in Chinese foreign relations since the end of the Cold War, Robert G. Sutter provides a nuanced analysis that shows that despite popular perceptions of its growing power, Beijing is hampered by both domestic and international constraints. This text's balanced and meticulous assessment shows China's leaders exerting more influence in world affairs but remaining far from dominant. Facing numerous contradictions and tradeoffs, they move cautiously as they deal with a complex global environment.
